

BLG 242E – Logic Circuits Laboratory Regulations

Preparations before Experiment:

- Every student should study the topics and carry out the tasks which are indicated in the experiment document.
- There may be individual quizzes before the experiment which evaluate your preparations. These quizzes will affect your overall grade at the end of the semester.
- More importantly, if you fail to achieve a certain grade in the quiz, you are not going to be accepted to the experiment and you will be considered absent for that week.

Attendance:

- There will be 8 experiments during the semester.
- Students who arrive to the laboratory more than 15 minutes late are not going to be accepted to the experiment and will be considered absent for that week.
- Students who do not attend two or more experiments (after the make-up weeks) will be given VF as letter grade.
In other words, there are 10 weeks (8 Exp. + 2 Make-up) in the schedule, a student should attend at least 7 of them in order to avoid having VF.
- Additionally, there will be one make up experiment one week after each 4 regular experiments for the students who attend at least 2 out of 4 experiments.

Report Submission:

- Each experiment group should prepare and submit a single report for each experiment.
- Reports have to be prepared by using the template in Ninova e-Learning System.
- Reports have to be submitted within one week after each experiment. One submission is sufficient for each group.

Evaluation:

- There will be no final or midterm examination.
- 70 percent of the overall grade will be evaluated on the experiment performance including the quiz grades. The remaining 30 percent is for the reports.
- If a student misses one experiment and do not attend the make-up experiment, it will be graded as 0 at the end of the semester.

Laboratory Coordinators:

R.A. Atakan ARAL (aralat@itu.edu.tr)

R.A. Müge EREL (erelmu@itu.edu.tr)

R.A. Gökhan SEÇİNTİ (secinti@itu.edu.tr)
